

Funding programme administered by the Vienna Business Agency

Creative Industries: Project

Objectives

Creative enterprises make a significant contribution to the dynamism of a city's economy. Their economic value goes far beyond generating creative products and providing long-term jobs. These enterprises have a unique approach to complex challenges and predominantly work on a multidisciplinary basis, making them drivers of innovation with a game-changing influence on other sectors. Furthermore, creative accomplishments are a clearly visible element in the life of any city and help to shape its identity. Flourishing creative industries make a city attractive to residents, visitors and investors.

This funding programme therefore aims to facilitate the development of products, services and processes in the creative industries, consolidate existing structures, and increase the competitiveness of the creative industries overall. In addition, this funding programme will help to drive innovation, growth and employment in Vienna.

This funding programme shares the general aims (economic effects, focus on innovation and social benefits) of the "Framework Guidelines 24+ on Monetary Economic Promotion of the Vienna Business Agency" ("Framework Guidelines" or "FG").

This programme also addresses the following focus topics listed in the preamble of the Framework Guidelines:

- Climate protection/environmental targets
Regardless of the intended outcomes, applicants must clearly and plausibly demonstrate how the topic of climate protection is incorporated in the planning and implementation of their project.
- Diversity
Regardless of the intended outcomes, applicants must clearly and plausibly demonstrate how the topic of diversity is incorporated in the implementation of their project.

Target group

This funding programme is aimed at existing enterprises and enterprises currently being established in the creative industries in Vienna. The creative industries are defined as comprising the following fields: architecture, design, the film industry, the arts market, fashion, multimedia and games, the music industry and publishing.

In addition to existing enterprises in the creative industries, this funding programme is also targeted in particular at graduates of relevant educational institutions and established creatives who are inspired to establish their own company by the funding programme.

With regard to partnership-based funding applications, associations and other legal entities (pursuant to Section 2 of the Framework Guidelines) from the cultural, social, research and education sectors are also eligible for funding, subject to the condition that the lead partner is an existing enterprise or an enterprise being established in Vienna.

Eligible projects

This funding programme supports creative enterprises in the development of new creative products, services and processes in the fields of architecture, design, the film industry, the art market, fashion, multimedia and games, the music industry and publishing.

It focuses on the creative quality of the project and its long-term economic value to the enterprise. The project must be underpinned by a high-quality concept and have unique features that set the project apart from what is

already on the market. Reproducibility and standardisation are key characteristics of the products, services and processes to be developed. Projects must be embedded in a coherent, overarching entrepreneurial concept and include a promising market entry strategy to address the target group for the first time and establish initial positioning.

The funding can support the long-term creation of company processes and structures in enterprises currently being established. A project submitted by an existing enterprise must differ significantly from the enterprise's previous projects.

The project must be implemented to a significant extent by internal employees and may be supplemented by the procurement of external services to ensure a long-term knowledge build-up in the enterprise.
